SUMMARY

Full Stack Engineer with 3+ years of experience building **scalable, production-grade web and mobile applications**. Strong expertise in both **frontend and backend development**, using **React.js, React Native, Node.js, Express.js, and NestJS** to deliver high-performance, end-to-end solutions.

Proficient in designing **intuitive user interfaces** with a focus on **performance, state management (Redux), and form handling (React Hook Form)**, while also building robust backend systems with **REST/gRPC APIs, microservices architecture, and TypeScript**.

Experienced in **database optimization, distributed systems**, and deploying applications using **Docker, CI/CD pipelines, and AWS infrastructure**. Passionate about **clean architecture, system design**, and owning the full development lifecycle from concept to production.

Technical Skills

- **Languages:** JavaScript, TypeScript
- **Frontend:** React.js, React Native, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, NestJS, REST APIs, gRPC
- **Databases:** MongoDB, PostgreSQL, MySQL (Mongoose, TypeORM, Sequelize)
- **Architecture:** Microservices, API Gateway, MVC
- **DevOps:** Docker, GitHub Actions (CI/CD), AWS EC2, Nginx
- **Authentication:** JWT, OAuth2 (Google, Facebook, Apple)
- **Payments:** Stripe, Razorpay, PayPal
- **Tools:** Git, Postman, Swagger

Experience

Software Engineer — NewAgeSMB, Kochi

2023–2025

- Designed and developed scalable backend services using **Node.js, Express.js, and NestJS** for high-concurrency applications
- Built and optimized REST APIs, improving performance through efficient query structuring and indexing
- Developed cross-platform mobile applications using **React Native**, improving user experience and performance
- Contributed to frontend development using **React.js and Next.js**
- Integrated third-party services including payment gateways and authentication providers
- Deployed applications on **AWS EC2 with Nginx reverse proxy and load balancing**
- Containerized applications using **Docker** and implemented CI/CD pipelines using GitHub Actions

Freelance Full Stack Developer — Self-Employed

2019–Present

- Delivered end-to-end web applications, handling frontend, backend, and deployment
- Built responsive applications using React and Node.js
- Managed hosting and maintenance for client projects

Projects

DevX API Suite (Microservices Backend System – In Progress) — *NestJS, TypeScript, PostgreSQL, MongoDB, gRPC, Docker, API Gateway, AWS*

- Architecting a production-grade microservices system (Auth, User, Chat, Notification)
- Implemented API Gateway for centralized routing and authentication
- Designed gRPC-based inter-service communication for low latency
- Built hybrid database architecture (PostgreSQL + MongoDB)
- Structured services with independent data layers for scalability
- Containerized services using Docker
- Designing system for horizontal scaling and fault isolation
- Setting up CI/CD pipelines (GitHub Actions)

Social Media Platform (Real-Time System) – *React, Node.js, Express, Socket.io, MongoDB, AWS EC2, Nginx*

- Built real-time messaging system using Socket.io
- Implemented secure authentication using JWT
- Designed scalable REST APIs for posts, comments, and user interactions
- Deployed on AWS EC2 with Nginx reverse proxy and load balancing
- Managed production environment and server configuration
- Optimized MongoDB schema for scalability

Watchmen – E-commerce Platform – *Node.js, Express, MongoDB, Razorpay, PayPal, Twilio, AWS EC2, Nginx*

- Developed full e-commerce system with admin dashboard
- Integrated Razorpay and PayPal payment gateways
- Implemented OTP authentication using Twilio
- Designed complete order lifecycle management system
- Built coupon and pricing engine
- Deployed on AWS EC2 with Nginx and load balancing

System Design & Backend Expertise

- Microservices architecture and API Gateway design
- gRPC-based communication
- Database design, indexing, and optimization
- Deployment using AWS EC2, Nginx, and load balancing
- CI/CD pipelines and containerized deployments

Education

B.Sc. Mathematics – MG University

MERN Bootcamp – Brototype

Key Strengths

- Strong backend engineering and system design mindset
- Ability to build scalable production-ready systems
- Ownership of full product lifecycle
- Clean, maintainable code practices

Declaration

I hereby declare that the above information is true to the best of my knowledge.

Kochi, Kerala
